Morningstar Rating™ ★★★★★

**Fund Description**

The Global Investment Grade Credit Fund is an actively managed portfolio that invests at least two-thirds of its assets in primarily investment grade global corporate and credit instruments. Portfolio duration may vary within two years of the benchmark and the fund may tactically invest up to 15% of assets in below-investment grade issues.

**Investor Benefits**

This fund offers the diversification benefit, yield premium, and greater total return potential of corporate and credit versus government securities.

**The Fund Advantage**

The fund employs a diversified, risk-controlled, value-based approach to investing, expertise across global bond markets, and a broad opportunity set.

**Risk Profile**

Share value can go up as well as down and any capital invested in the Fund may be at risk. The Fund may invest in non-U.S. and non-Eurozone securities which involve potentially higher risks including currency fluctuations and political or economic developments. These may be enhanced when investing in emerging markets. Funds that invest in high-yield, lower-rated securities, will generally involve greater volatility and risk to principal than investments in higher-rated securities. The Fund may use derivatives for hedging or as part of its investment strategy which may involve certain costs and risks. Portfolios investing in derivatives could lose more than the principal amount invested. For more details on the fund's potential risks, please read the Key Investor Information Document.
